

Sure-Flex Plus[®] Maintenance Savings Calculator

Calculate potential savings over 5 years

Sure-Flex[®] PLUS+

Sure-Flex Plus Maintenance Savings Calculator App

- Save hundreds – or thousands – on maintenance
- Sure-Flex Plus sleeve life is **over 3x** that of imitators
- Maintenance intervals can be extended by 3x or more using Sure-Flex Plus
- More durable: Minimize downtime from competitors' premature sleeve failure

Sure-Flex[®] PLUS+

It's been **over 60 years** since TB Wood's introduced the **original Sure-Flex coupling**. The first elastomer sleeve coupling on the market, Sure-Flex immediately became very popular with both end users and OEMs for the product's many features and benefits, including:

- Easy to install
- Economical
- Accommodates misalignment while minimizing vibration
- Protects connected equipment

Due to the popularity and the proven performance of TB Wood's Sure-Flex couplings, many companies have tried to imitate this product, but none have been able to match the performance and quality of the original.

Through our continual product improvement efforts, **we've made Sure-Flex EVEN BETTER** with the introduction of our **new Sure-Flex Plus high performance** EPDM and Neoprene sleeves.

State-of-the-art polymer compounds have enabled a **30% higher torque rating** for all EPDM and Neoprene sleeves – performance that the copies have yet to match.

When selecting a full coupling for a new application or replacement, this higher rating also **often enables users to select a smaller coupling, reducing cost by an average of 25%**.

But what if you already have a Sure-Flex (or imitator) coupling installed and you only need a replacement sleeve?

When shopping for coupling sleeves, it is important to remember that **not all rubber is created equal**, and no other sleeve matches the performance of Sure-Flex Plus. The advanced material used in Sure-Flex Plus sleeves offer greatly improved fatigue performance and reduced sleeve wear.

Testing has shown that size-for-size, **Sure-Flex Plus outlasts the closest imitator by a factor of 3:1**. The long life and increased reliability of high-performance Sure-Flex Plus sleeves offer a significant cost savings over the life of the equipment:

- **Fewer sleeve replacements**
- **Reduced maintenance cost**
- **Reduced equipment and plant downtime**
- **Fewer breakdowns**

TB Wood's has created an app that quantifies the **significant savings** when replacing a competitor's sleeve with a Sure-Flex Plus EPDM or Neoprene sleeve.

Web and phone apps are at **www.SureFlexPlus.com** – **Download to your Apple or Android device now.**

Don't give up performance and money by using an inferior coupling sleeve.

Make the smart choice: Demand genuine TB Wood's Sure-Flex Plus!
